

Final Meeting Minutes

Based on Administrative Order No. 6722 dated 2025-9-1, which included the formation of the Industrial Advisory Council of the Department of Mechanical Techniques – Production Branch for the academic year 2025-2026, the Council held its final meeting on Wednesday, 2026-6-3, according to the agenda shown below:

First / Discussion of the memoranda submitted by the instructors of the specialized academic courses in the Department of Mechanical Techniques – Production Branch. These memoranda included keeping the contents of some courses unchanged, as the instructors do not see a need to develop them because they are appropriate for the academic level of institute students, especially since a large proportion of the department's students are graduates of vocational preparatory schools. In addition, the polytechnic colleges are in the process of transitioning toward polytechnic status for their technological departments, which will require proposing an integrated study on the new curricula that will be more consistent with the labor market, as well as with the academic level of the department's students. These courses are:

- 1- Memorandum of Mr. Lecturer Sawara Mohsen, instructor of Manufacturing Processes 3 and Manufacturing Processes 4 for the second academic level, Attachment No. 1, in which he stated that there is no need to develop the scientific contents of these courses.
- 2- Memorandum of Ms. Assistant Lecturer Afyan Mohammed Abdulwahab, instructor of Mechanics 1 and Mechanics 2 for the first academic level, Attachment No. 2, in which she stated that there is no need to develop the scientific contents of these courses.

Second / Discussion of the proposals submitted by the instructors of the specialized courses in the Department of Mechanical Techniques – Production Branch, which included replacing some items of the academic course contents with others that are more advanced and up to date, as follows:

- 1- Memorandum of Mr. Assistant Lecturer Hassan Mohammed Noor Al-Din, instructor of Machine Elements 1 and Machine Elements 2 for the second academic level, as shown in Attachment No. 3.
- 2- Memorandum of Mr. Assistant Lecturer Hassan Ismail Ridha, instructor of Manufacturing Processes 1 and Manufacturing Processes 2 for the first academic level, as shown in Attachment No. 4.
- 3- Memorandum of Mr. Assistant Lecturer Mohammed Salam Taha, instructor of Materials Properties 2 for the first academic level, as shown in Attachment No. 5.
- 4- Memorandum of Mr. Assistant Lecturer Mohammed Salam Taha, instructor of Engineering Drawing 2 for the second academic level, as shown in Attachment No. 6.

Third / The Council reviewed the approval of the Scientific Committee regarding the proposals for developing the academic courses listed in Paragraph Second above, as well as its recommendations, as shown in Attachment No. 7.

Fourth: Recommendations:

After approval, the Council recommends that all proposals be submitted to the College Council for endorsement, and then forwarded to the University Council to address the specialized committees.
